

ORDER CONSOLIDATION

Lodamaster offers various types of order consolidation systems supported by good-to-person and pick/put to light technologies to largely automate the order fulfillment process for companies with omnichannel and e-commerce needs.

Robotic goods-to-person technology can be used for automated put-away, inventory storage, replenishment, and order picking in fulfillment and distribution centers.

Pick/put to light technology is designed to improve picking accuracy and efficiency, while simultaneously lowering your labor costs.
