

## TELESCOPIC CONVEYORS

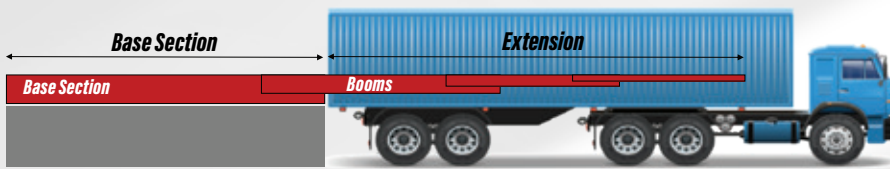

*Telescopic conveyors are extendible conveyors that help reaching inside the vehicles such as trailers, trucks, containers and vans to load or unload bulk products in a safer, quicker and cheaper way.*

- *Strong & Slim design enables freedom in installations.*
- *Safety First! Our units and options all focus on safety.*
- *Low and Easy Maintenance thanks to smarter design*
- *Reliable: Only the best components! We use high end PLCs, drives, etc.*
- *Best Lead Times and competitive prices in the market.*
- *Large variety of affordable options enables optimised performance.*

*Telescopic Conveyors are installed in most greenfield projects today as well as post-integrated to earlier installations to overcome the bottle-necks in loading and unloading in most logistics segments. Lodamaster offers both belted or gravity roller machines for loading/unloading operations.*

# TELESCOPIC CONVEYORS

Base	Booms	Extension	Total length
5.000	2	7.000	12.000
5.000	3	10.000	15.000
6.000	2	7.000	13.000
6.000	3	13.000	19.000
7.000	2	9.000	16.000
7.000	3	15.000	22.000

All dimensions in mm

## Options

Tilting Front End

Front Led Light

Hydraulic Tilt

Operator Platform

Raised Belt

Side pan / Handrail

## Other Options

- No-go Bar
- Over-length Detection
- Non std Voltage (230 V - 240 V, Single Phase)
- Gravity Rollers
- Reversible Belt Control
- Custom Addons
