LIGHTENING LOADS

automated
loading solutions

world leaders in loading solutions

We are Joloda Hydraroll and we are experts in material handling, particularly for loading and unloading processes.

We're more than 'off-the-shelf'. We're the pioneers, the creators, the experts. We design, manufacture, install, service and maintain world-class loading solutions. Here to innovate, automate and streamline your logistics and create the ideal solution.

Our world-class team have been loading and unloading for over 60 years and we have more than 500,000 loading systems under our belt. We have an experienced network of 30+ distributors that offer a helping hand to have experts in local standards.

This is precisely why around the world, we're known as the number one for loading and unloading solutions.

why choose an automated loading solution?

Get things moving quickly and efficiently with our automated loading solutions.

Our systems are built to speed up the standard processes that happen in every production and warehousing location. All of our automated solutions can load a trailer in under 3 minutes and can be integrated with existing conveyor infrastructure or AGVs for 100% end of line automation.

100% end of line automation

Reduced costs from the loading/unloading processes

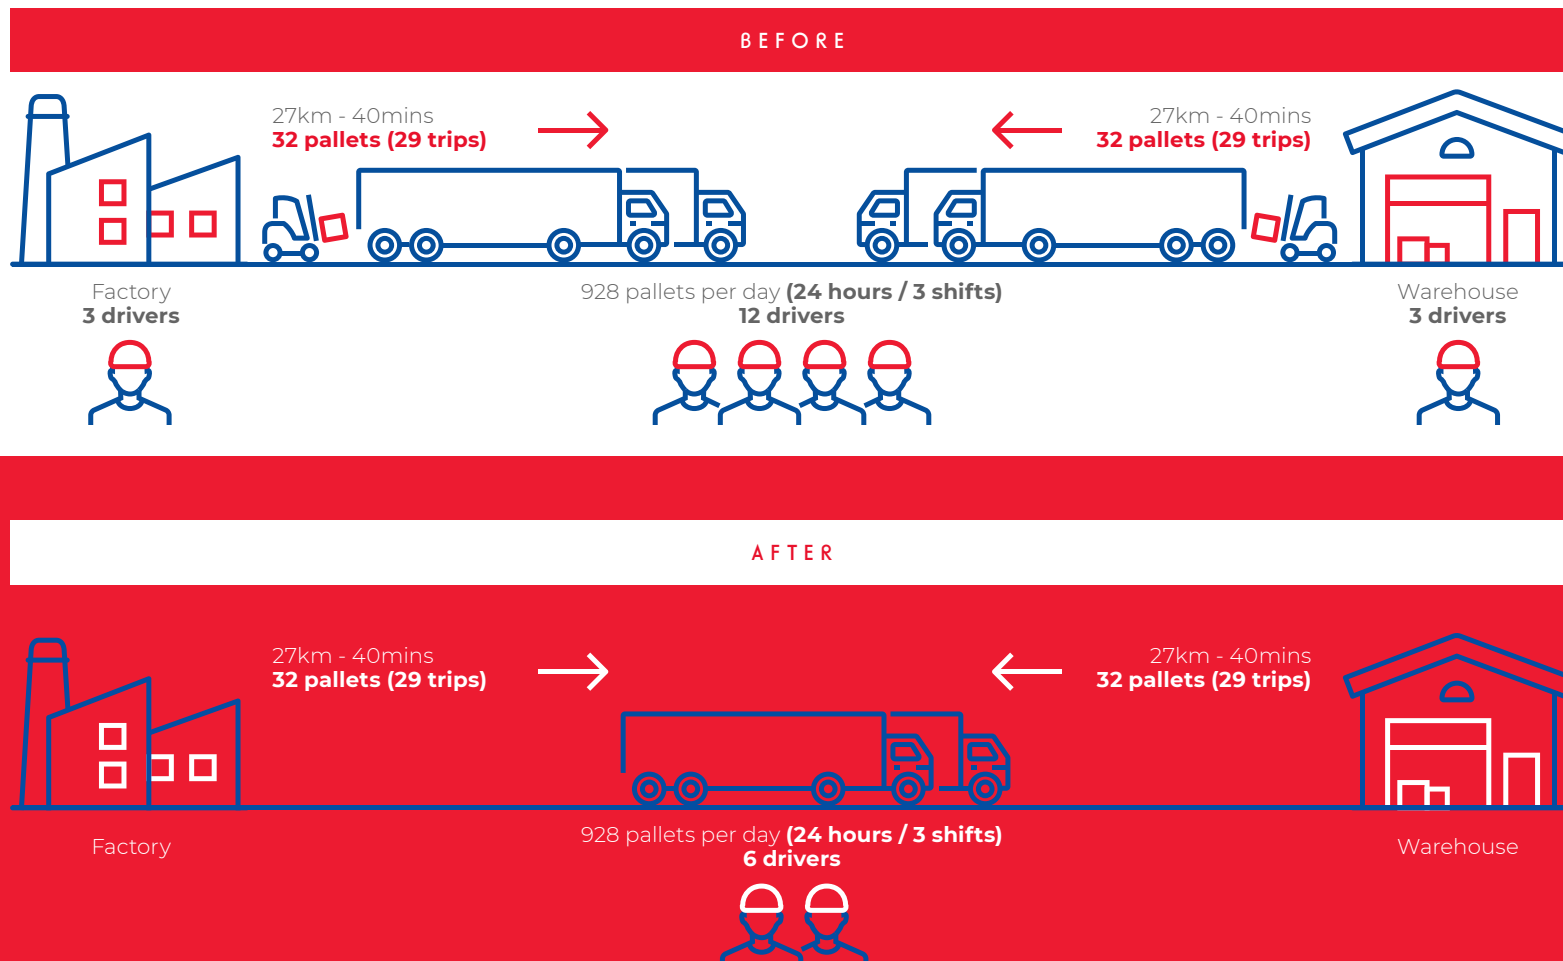

100% safety during high volume loading and unloading

Reduction in CO₂ – reduction in trailer fleet and no forklifts required

take a load off

Move the same number of pallets each day with an automated loading solution, **with fewer people, trucks and forklifts...**

is an automated loading system right for your business?

1. DO YOU OPERATE A SHUTTLE RUN?

2. DO YOU HAVE A HIGH DAILY OUTPUT OF PALLETS?

IF YES TO BOTH...

YOUR BUSINESS WILL BENEFIT FROM AUTOMATED LOADING

AS WELL AS FASTER TRUCK LOADING, YOU'LL ALSO GET THESE PAYBACKS

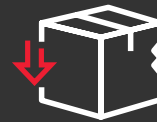

No forklifts needed for loading or unloading traffic in the loading area

Automation of the loading and unloading processes saves internal space

85% (+/-) reduction in waiting times for trailer drivers

Eliminate costs of product damage caused from handling

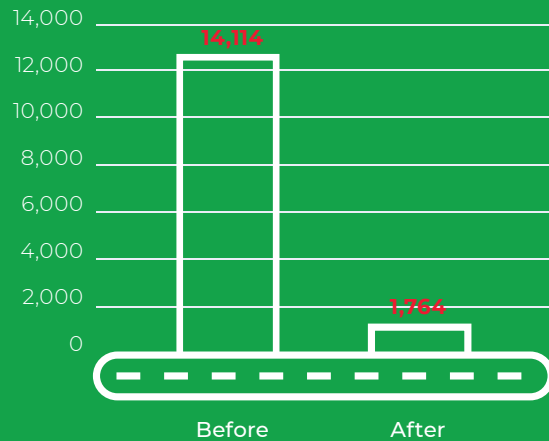

Eliminate accidents in the loading area

TYPICAL BUSINESS CASE RESULTS

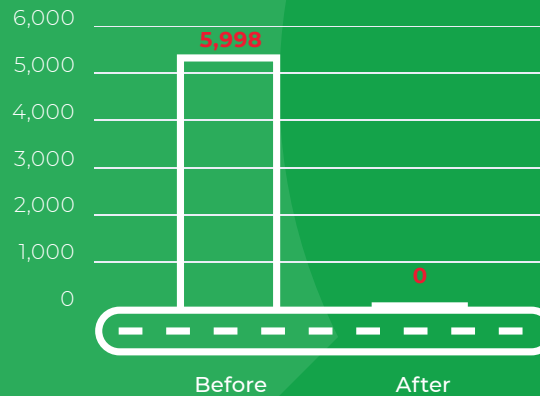

928 pallets per day, 32 pallets per truck
3 x 8 hour shifts, 365 days per year of work
Driving 90 minutes round trip
Loading and unloading process 35/40 minutes

Reduces 5,998 hours forklift driving per year
Reduces 2,642 KMs of forklift driving per year
Reduces 12,350 hours waiting time for the trailer drivers
Reduces from 4 to 2 trailers and from **12 to 6 trailer drivers**

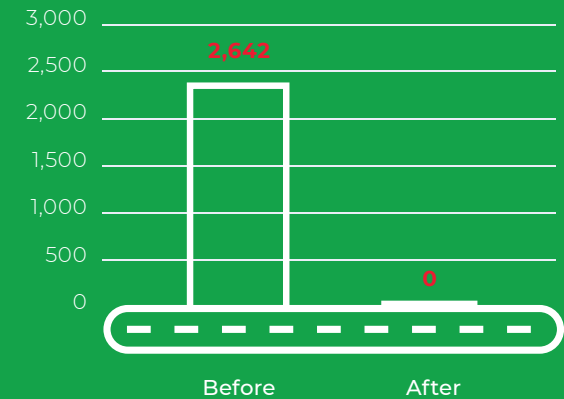

reduce your environmental impact

TRUCK DRIVER WAITING HOURS

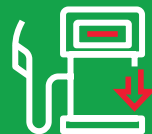

FORKLIFT DRIVING HOURS

FORKLIFT DRIVING HOURS

THE BENEFITS

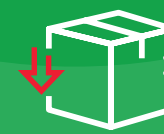

Less forklifts and trucks/trailers

= Less fuel consumption

Decongest traffic

= Less fuel emissions

Eliminates product, pallet & trailer damage

= Less waste

automated loading systems

Whatever your setup, our automated loading systems are durable and their modular design makes integration into existing systems easy. Only trailer adaptations are required, with no need for any civil works. Our systems can be loaded with forklifts/AGVs or can connect to existing production line conveyors. These are ideal for businesses across the FMCG, beverage, food and packaging industries and can improve speed, safety, output and efficiency.

MOVING FLOOR

The Moving Floor system is ideal for any business that needs to load abnormal pallets or unpalletised goods, such as whiskey barrels or tyres.

SCAN TO LEARN MORE

SLIPCHAIN

The Slipchain system is designed for all customers that have high volume logistics shuttle cases with a small fleet of dedicated trailers.
