Your business partner
who understands your needs
and accelerates your
logistic
capabilities

LODAMASTER Group, established in 2011, provides intralogistics solutions globally that include conveyor automation systems, sorter systems, vehicle (un)loading solutions, order picking solutions, and other warehouse technologies from our bases in Istanbul, and Poland.

Lodamaster can offer turn-key solutions in many countries with its teams in Turkey, Poland, and with our partners all over the world.

By using our expertise in warehouse automation and efficiency projects, and loading-unloading operations, we are providing firstly a consultancy service with analyzing your operations on-site and we are proposing the most suitable technologies for your operations.

Lodamaster Group | Technology Independent Integrator

200+ Projects

Lodamaster company has commissioned more than 200 projects since its establishment and has a growth rate of 50% or more every year.

15+ Countries

Lodamaster has implemented projects in more than 15 countries, adhering to one of its main goals, "becoming an international player".

References

Prioritizing customer satisfaction, it has references from large and international companies such as AMAZON, CEVA, DHL, ALIBABA, DPD, UNILEVER.

Technology Independence

Lodamaster is a technology-independent integrator. It has many technology partners all over the world and selects the right technology that fits the solution, not fit the solution around any technology.

Telescopic Conveyors

Load and unload the goods from parcels to tires in a **faster, easier, and safer** way using **Lodamaster Telescopic Conveyors**.

- Highest standard best components
- Most advanced safety features in the market
- Tough endurance tests
- All the sizes and types in the market
- Easy access for maintenance
- A large variety of optional functions

Lodamaster Group | Telescopic Conveyor Network

Lodamaster Group | Telescopic Conveyors

Telescopic Belt Conveyors

The telescopic belt conveyor is designed to minimize the need for operators to carry products manually.

Extension and retraction are fully motor-driven, with a fast response to operator actions.

The conveyor can also switch between indexing mode and fast transport for buffering functionality.

Telescopic Gravity Conveyors

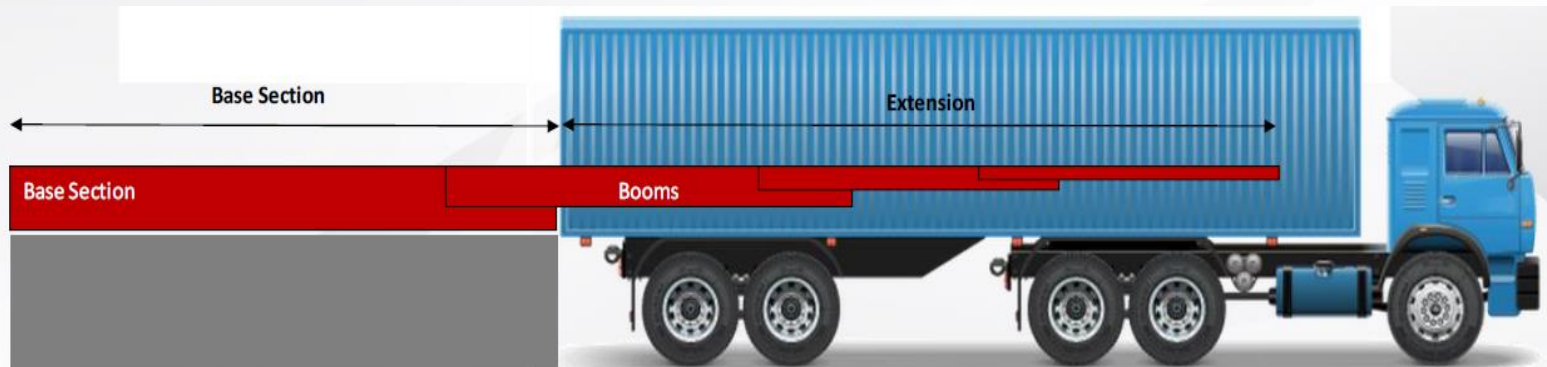

The telescopic gravity roller conveyor is designed for loading packages by using the slope of the machine.

These units are often used with sorter systems or backline conveyors.

Lodamaster Group | Telescopic Conveyors

Dimension (m)	5 x 15	6 x 19	7 x 22	7,5 x 24	8 x 28

Width from 600 to 1000 mm	✓	✓	✓	✓	✓

Base (mm)	Booms	Extension (mm)	Total Length (mm)
5.000	3	10.000	15.000
6.000	2	7.000	13.000
6.000	3	13.000	19.000
7.000	3	15.000	22.000
7.500	3	16.500	24.000
8.000	4	20.000	28.000

Lodamaster Group | Telescopic Conveyors

Solution Strengths

While 2 people (un)load a truck manually in 4 hours, only one person can do it **in 30 minutes or less** with Lodamaster Telescopic Conveyor

If a person violates the safety boundary surrounding the equipment, the safety light curtain immediately stops all movement.

The ROI is **less than two years**

Works **24/7** with minimal supervision

Parcels and packages are evenly distributed and provide you with up to **an 80% occupancy rate**

Limits the risk of accidents to personnel and damage to goods

Lodamaster Telescopic Conveyor's Features

Standard Features

- Front control panel
- Front safety switch
- PLC controls
- Belt Override Switch
- Indexing sensor at the front
- High support legs
- Front led light
- Pop-up roller at the front
- 50kg/m load capacity
- Maintenance hatch
- Maintenance windows
- Underguards

Optional Features

- Front Led Bridge
- Mobile on Wheels / Rails
- Hydraulic Tilt
- Foldable Operator Platform
- Raised Belt
- Tilting Front End
- No-go Bar
- Side pan / Handrail
- Extra Start-stop Buttons
- Over-length Detection
- Non-std Voltage (230-240 V Single Phase)
- Reversible Belt Control
- Store-Feed-Run Function
